

RAW Information Security Statement

Our Commitment

RAW is committed to protecting the confidentiality, integrity, and availability of information across all its operations. Information security is treated as a core business enabler and an integral part of how the organisation designs, operates, and delivers its products and services.

RAW Group operates a certified Information Security Management System (ISMS) in accordance with ISO/IEC 27001:2022, providing a structured, risk-based framework for managing information security risks and meeting applicable legal, regulatory, and contractual obligations.

Scope

This Information Security Statement provides a high-level overview of RAW's approach to information security. It applies across all RAW Group entities and operations and reflects the organisation's commitment to protecting information belonging to customers, partners, employees, and other stakeholders.

This statement is published for transparency and assurance purposes and does not disclose operational, technical, or sensitive security details.

Information Security Objectives

RAW's information security objectives are to:

- Protect stakeholder trust by safeguarding sensitive and business-critical information
- Embed security by design into systems, processes, and projects
- Manage information security risks through a structured, ISO/IEC 27001-compliant risk management approach
- Ensure compliance with applicable legal, regulatory, and contractual requirements
- Continuously improve the effectiveness of the ISMS in response to evolving threats and business needs

Security Principles

RAW's information security framework is based on the following principles:

- Risk-based protection
- Appropriate access
- Responsible third-party management
- Preparedness and resilience
- People and awareness

Governance and Certification

Information security governance at RAW Group is led by executive management and supported by defined roles and responsibilities. The ISMS is subject to regular internal reviews, risk assessments, and independent audits to ensure its continued suitability, effectiveness, and conformity with ISO/IEC 27001:2022.
